Sara – Basic fingerless mitts

Material and size

Yarn: Silk Blend from Manos Del Uruguay, 50 g = 135 m, 1 skein
Needles: Dpns size 3.5 mm or size needed to obtain 11 stitches x 16 rows for 5 x 5 cm in stocking stitch.
Size: Small(Medium)Large

Both mitts

Cast on 32(36)40 stitches and join for knitting in the round. Be careful not to twist!
Knit rib *k1, p1*, repeat *-* until work measures 10 cm.
Knit stocking stitch (all stitches are knitted) until work measures 1 cm from the rib (approx. 4-5 rows). Start knitting thumb increases as described below

Right hand thumb gusset

K1, place marker, yo, k1, yo, place marker, k30(34)38 (the 3 stitches between the markers are you first thumb gusset stitches). The yarn overs are knitted in back loop on the next row to avoid holes. The markers are slipped on every row.

Keep making increases on every third row as described above until you have 13(13)15 stitches between the markers. The yarn overs are always made next to the markers. Knit 2 more rows after the last increase, then place thumb stitches on a stitch holder or scrap yarn. Cast on 1 new stitch behind the thumb on the next row. Work should now measure approximately 16(17)18 cm.

Left hand thumb gusset

The left hand gusset is knitted as right hand gusset but the markers are placed around the 15th(17th)19th stitch instead of the 2nd on the first row of increases. Thus the first row is knitted as follows: k14(16)18, place marker, yo, k1, yo, place marker, k17(19)21.

After the thumb gusset is complete, keep knitting as before, thus knitting all stitches until work measures approx 20(21)22 cm (about 1.5 cm left to the lower joint of your little finger when you try the mitt on). Knit rib (k1, p1) for 5 rows. Cast off in rib.

Thumb

All stitches on the thumb are knitted.
Place the 13(13)15 stitches on the stitch holder back onto your needles and pick up 4 additional stitches behind the thumb. The 4 new stitches are knitted k2tog on the next row making the total number of thumb stitches 15(15)17.
Keep knitting all stitches until thumb measures approximately 1.5-2 cm. The thumb should reach just up to the joint of your thumb when the mitt is tried on. Cast off knitwise.
