Flaminia top

Dear customer, thank you for choosing my pattern and for supporting my work! Please remember this pattern was created by Laura Grandinetti - Lemaninelabcrochet - and, even if it's a free pattern, it cannot be modified, sold, shared, distributed, translated or copied in any way, either in a whole or in parts. You may, however, sell finished products made following this pattern. In this case, please, be sure to mention "Lemaninelabcrochet" among the references.

It would also be really important for me if you use the hashtags #lemaninelabcrochet and #flaminiatop and tag @lemaninelabcrochet if you share your work made with this pattern on social networks (also because I'd like a lot to see it!).

Lemaninelabcrochet

This is a made to measure pattern, which means you can make the top in the size and with the yarn you prefer.
Below, in fact, you will find instructions containing cm and number of stitches worked by me, but also indications for making the top of the size you want and with the yarn you want.

Summary of the work:
The top is made up of two identical rectangular panels worked on the flat in round-trip turns and then sewn together.

Materials:

For my top, size M crop top version, I used about 150 gr (480 mt) Fingering 4 PLY super fine weight yarn, hook E n 3,5 mm, but, as said, you can do it with the yarn you prefer.

To calculate the stitches to start with you will therefore have to make your sample.

Abbreviations: (US terms)

ch: chain/s
sc: single crochet
ch 3 sp: space of 3 chains
st: stitch/es
trc: triple crochet
rep: repeat

Stitch and gauge

The stitch used is a repetition of 2 rows plus 1 of preparation.

<u>Turn the work at the end of each row.</u>

Chain 29 + 1 or a number of ch multiple of 24 + 5 + 1

Row 1): starting from the 6th ch from hook crochet 1 sc, *9 ch, skip 8 st, 2 trc in the same st, 1 trc, 2 trc in the same st, 9 ch, skip 8 st, 1 sc, 3 ch, skip 3 st, 1 sc** rep from * to ** for all the row.

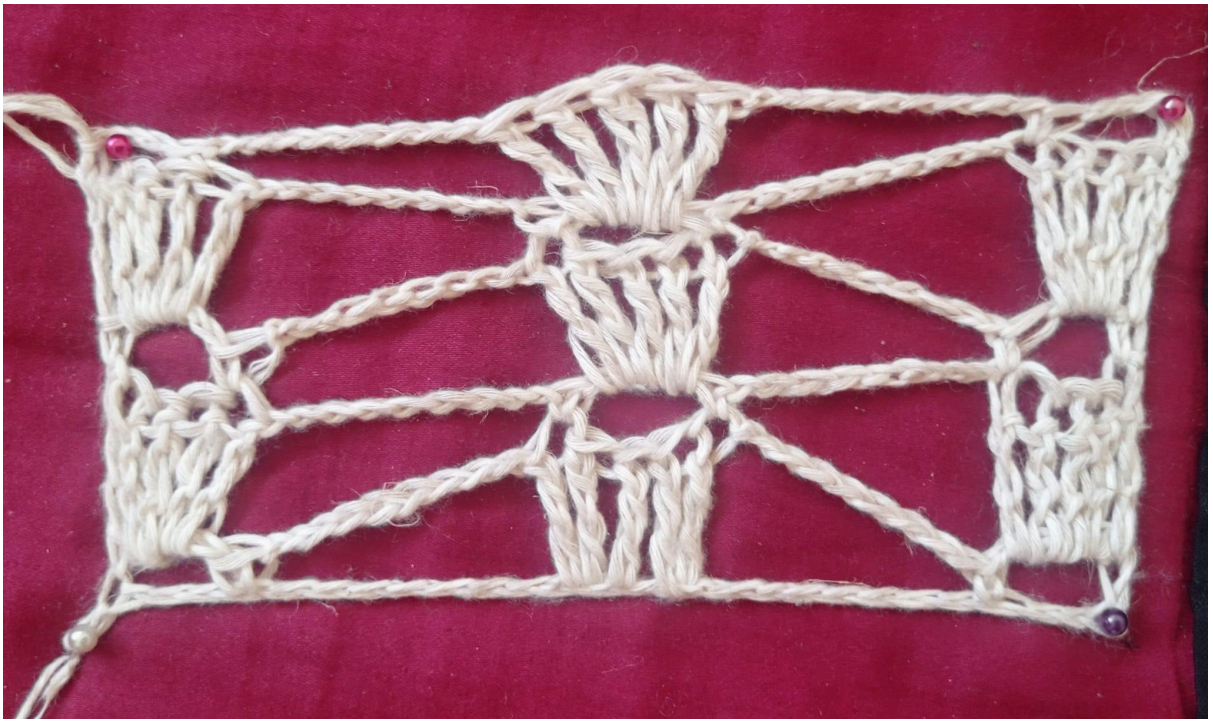
Row 2): 4 ch (they count as 1st trc), 4 trc in the ch 3 sp, *9 ch, 1sc in the 1st trc below, 3 ch, skip 3 trc, 1 sc in the last trc, 9 ch, 5 trc in the ch 3 sp** rep from * to ** for all the row.

Row 3): 4 ch (they count as 1 sc and 3 ch), 1 sc in the last trc below, *9 ch, 5 trc in the ch 3 sp, 9 ch, 1 sc in the 1st trc, 3 ch, skip 3 trc, 1 sc in the last trc** rep from * to ** for all the row; it ends with 1 sc in the 4 ch that count as the 1st trc of the row below.

Rep rows 2) and 3) for 5/10 cm.

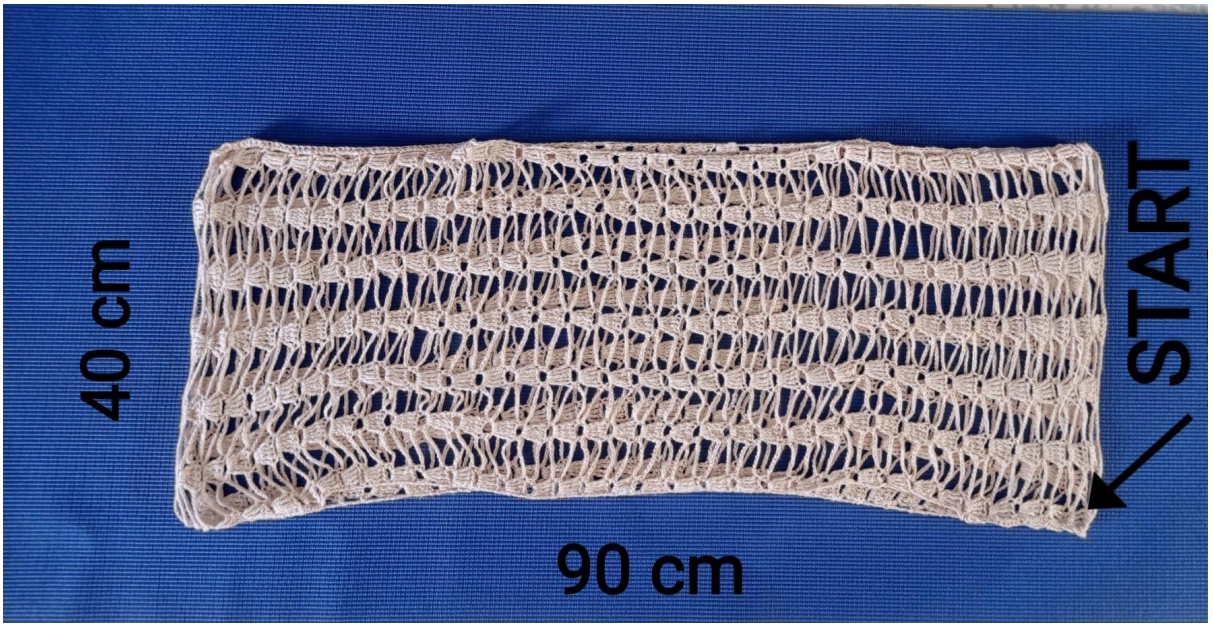
Block the sample before to measure it.

I chain 29 + 1 and worked for 5 rows obtaining a sample of 15 x 7 cm after blocking.



START

The creation of the top starts from what will be the edge of the sleeve, that is the short side of the panel, and will continue lengthwise up to the edge of the other sleeve.



Chain 77 + 1 or a number of ch, multiple of 24 + 5 + 1, useful for obtaining the cm you want, considering that this will be the width of the sleeves as well as the shoulder-waist length of the top (which is anyway designed to be a crop top model).

I worked a number of ch equal to approximately 40 cm.

To calculate how many st to start with you will have to do this calculation:
Multiply the number of st made for the gauge (in my case 29 st) by the cm you want the sleeve to be wide (in my case 40 cm).
Then divide the result by the cm of length obtained with your gauge (in my case 15 cm).

In my case I have 29 st in 15 cm as X st in 40 cm

- 29 : 15 = X : 40
- 29 x 40 ÷ 15 = 77,33

Make sure that the number of st you get is a multiple of 24 + 5 (in my case 77 - 5 = 72; 72 ÷ 24 = 3) and round it up if necessary.

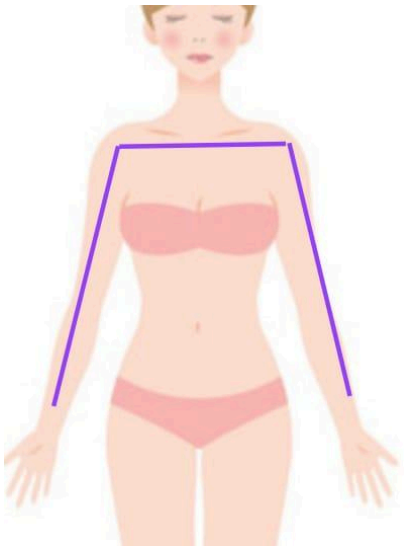
Once you have worked your ch, let's start working on the first panel.
<u>Turn the work at the end of each row.</u>

Row 1): starting from the 6th ch from hook crochet 1 sc, * 9 ch, skip 8 st, 2 trc in the same st, 1 trc, 2 trc in the same st, 9 ch, skip 8 st, 1 sc, 3 ch, skip 3 st, 1 sc** rep from * to ** for all the row.

Row 2): 4 ch (they count as 1st trc), 4 trc in the ch 3 sp, *9 ch, 1sc in the 1st trc below, 3 ch, skip 3 trc, 1 sc in the last trc, 9 ch, 5 trc in the ch 3 sp** rep from * to ** for all the row.

Row 3): 4 ch (they count as 1 sc and 3 ch), 1 sc in the last trc below, *9 ch, 5 trc in the ch 3 sp, 9 ch, 1 sc in the 1st trc, 3 ch, skip 3 trc, 1 sc in the last trc** rep from * to ** for all the row; it ends with 1 sc in the 4 ch that count as the 1st trc of the row below.

Rep rows 2) and 3) until you get the sleeve-to-sleeve length you want.



I worked for about 90 cm calculating my measure from elbow to elbow.

You can obviously make the length you prefer, according to your measurements and the type of sleeve you prefer (from wrist to wrist for a long sleeve, from mid-forearm to mid-forearm for a ¾ sleeve, etc).

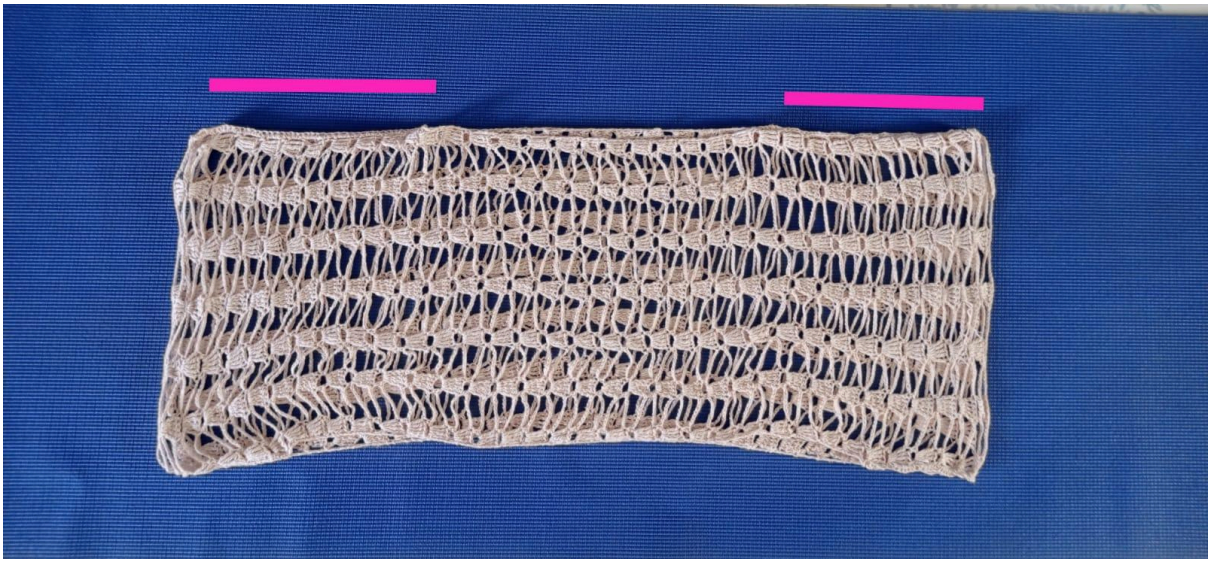
Once you get the desired length, fasten off and put the work aside.

Then make a second panel identical to this one.

ASSEMBLY

Once you have made the two panels, block them separately on the flat before sewing them together.
This step may seem tedious, but the effort will be rewarded because your top will be much more beautiful!

Neckline
Then proceed to sew along the long side of the panels to create the opening for the neckline.

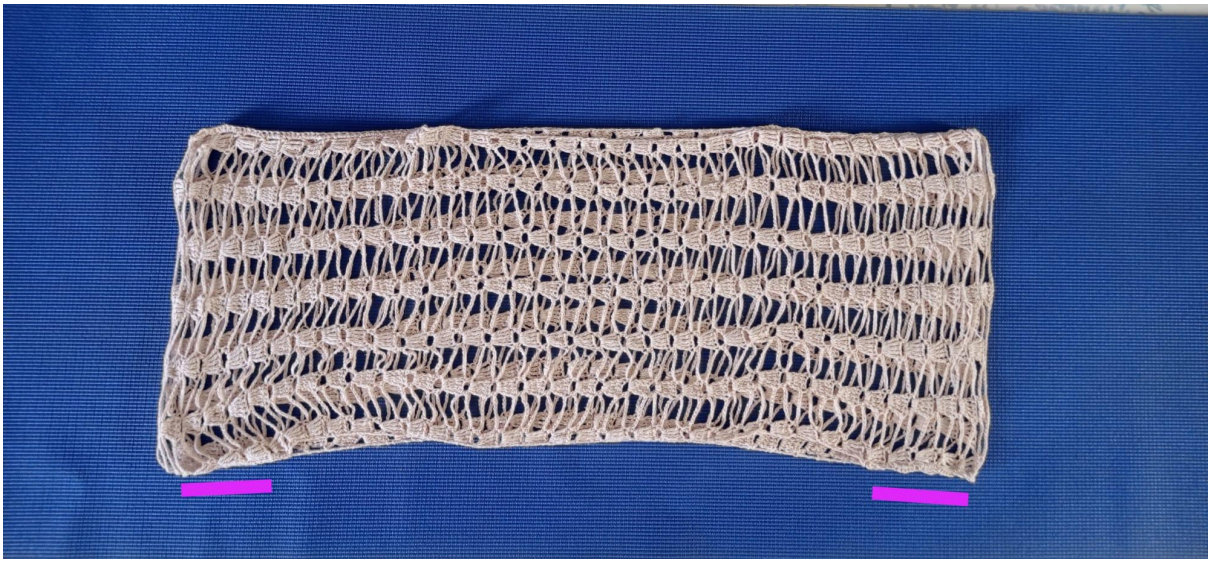


I made a very wide boat neck, so I sewed about 26 cm on each side, leaving about 38 cm.

Again, you can make the neckline according to your measures and preferences, just make sure you sew the same number of cm on each side, so that the neckline opening is perfectly central.

Sleeves

Sew the two panels together along the other long side too, to create the sleeves.



In this case I sewed about 12 cm on each side.

At this point your top is ready to be worn!

I hope you enjoyed this pattern and are happy with the result.

If you want to show me how it came out you can write to me at lemaninelab@gmail.com or via Instagram @Lemaninelabcrochet.
I would be really super happy!
And don't forget to tag me if you post your work on social media!
